

# Digital Images Library Needs Your Help!

Project Title	Digital Images Library Needs Your Help!
Project Summary	Organize expansive collection of digital images related to the James A. Garfield National Historic Site.
Country	United States

## Project Description

The James A. Garfield National Historic Site has hundreds of digital images in dozens of files across our shared drive. eInterns who are organized and pay attention to details are needed to label images and place them in folders several different ways - based on theme, location, etc. This project will be an exciting challenge, assuming that the eIntern has never been to the Garfield site, we will work via online communication platforms (GoogleChat, FaceTime, etc) to provide "tours" of the property, so you can see each area and thus identify pictures associated with them. The result? Providing rangers with an easy-to-find, accessible collection of digital images for use on our social media sites, website, and printed interpretive products.

## Required Skills or Interests

Skill(s)  
Data analysis  
Design thinking
